SUMMARY

As a skilled MERN Full Stack Web Developer, I specialize in creating user-friendly and efficient static and dynamic websites. I focus on developing websites that align with client requirements while optimizing existing code for improved functionality and performance. My passion for full Stack technologies drives me to stay updated with industry trends and apply innovative solutions. I am enthusiastic about contributing my skills to drive growth and success for your company.

SKILLS

Languages and DataBases: JavaScript | Node.js | Express.js | React.js | MongoDB

Other Skills: HTML5 | CSS3 | Axios | JSON | Ajax | RESTful APIs

PROJECT

GLITCH Fashion E-commerce Web Application [🔗](#)

- An online fashion clothing brand and shopping platform that makes it easy to choose from collections that are highly durable, stylish, and affordable.
- Developed the backend using Node.js and the Express.js framework for APIs, with MongoDB as the database. Built the frontend using React.js and styled the user interface with Tailwind CSS.
- This project demonstrates my ability to develop a full-stack application from scratch, utilizing modern web technologies and best practices.

EDUCATION

B.E-Electronics and Instrumentation Engineering

2020 – 2024

Hindusthan College Of Engineering And
Technology, Coimbatore

- 8.47 CGPA
